For Immediate Release

Moxlow Earns 7th at COTA Despite Balance of Performance

Austin, Texas (20 May 2013)— Dane Moxlow, pilot of the #7 Trenton Forging/CP Carrillo/Cardinal Energy Group/Huntington Bank Ford Mustang Boss 302s, finished 13th and 7th in rounds 4 and 5 of the Pirelli World Challenge at the brand new Circuit of the Americas track in Austin, Texas last weekend. The weekend had its ups and downs when it came to the performance of the Mustang, and Moxlow and the crew tried several adjustments throughout the week to make it more competitive. The Dane Moxlow Racing team has been at a significant disadvantage with their platform for quite a while, but this weekend they made leaps and bounds towards redevelopment of the Mustang setup to compete with the rest of the manufacturers in the series. The team felt that they started to head in the right direction during this event in regard to the setup, but Saturday they may have gambled a bit too much.

“The Saturday race did not go as planned but I was extremely happy to finish P13 unscathed, a rarity in World Challenge. I personally drove a great race in a not-so-great car, especially because I had to drive around cars that illegally passed during a full-course caution when the series did not reshuffle the pack. After making more adjustments in the opposite direction Saturday night we had the pace on Sunday for a better finish but we didn’t have the luck. I’m happy with the P7 finish from starting 12th, but I’m looking forward to the Detroit Belle Isle Grand Prix for another shot at a stronger finish. Thanks to all of our sponsors for the support and my tireless crew for the long hours in the Texas sun. Your encouragement is much appreciated!” says Moxlow.

Watch the race when it airs on NBC Sports on June 16th at 5 p.m. EST. Rounds 6 and 7 of the Pirelli World Challenge series will take place the weekend of May 31st at the Detroit Belle Isle Grand Prix in Detroit, Michigan.

Follow Dane on Twitter @DMoxlow or on Facebook at Dane Moxlow Racing for real-time and trackside updates, and on www.danemoxlow.com to stay up-to-date on all of the excitement.

Autosport Development is a one-stop organization for trackside support or design, construction, and prototyping for your race or street car. CP-Carrillo was founded with the mission of servicing the needs of enthusiasts and racers who desire to build the highest quality engines. CP-Carrillo ensures the highest quality by using the latest technology to manufacture its products, including state-of-the-art equipment, proprietary tooling and dedicated cutters. Along with unique fixturing, computer modeling and five-axis machining, CP-Carrillo employs a multi-level inspection process that includes an advanced climate-controlled inspection department to guarantee that each piston and rod is second to none. If you are in the market for a rotating assembly no need to look further— pistons, rods, wrist pins, rings, except the crank. By purchasing all of these components together CP-Carrillo coordinates designs and specifications to allow these parts to integrate precisely and perform optimally- an advantage no other piston and conrod manufacturer can claim. CP-Carrillo is a member of PANKL Racing Systems.
