Moxlow Sees Highs and Lows at Detroit Grand Prix

Detroit, Michigan (5 June 2013)— Dane Moxlow, pilot of the #7 Trenton Forging/Eaton Steel/Cardinal Energy Group/Huntington Bank Ford Mustang Boss 302s, saw both highs and lows at the Detroit Grand Prix last weekend, finishing 7th on Saturday and being punted into the tires on Sunday after a season-high 5th in qualifying. According to Moxlow, the car's setup was the best that it has ever been during the practice sessions and qualifying. The team has been struggling a lot with it and it was refreshing to hear from Dane that he could really drive the Belle Isle track the way a driver should be able to.

“The setup really paid off during qualifying and Saturday's race. We finished 7th but I felt like there was more left in me as a driver and in the car, so I was pumped for Sunday's qualifying session and the race. Unfortunately, someone went way too deep in Turn one took me out on the restart after a full-course yellow and punted me into the tires. It was disappointing because I was in a really good position to make strides forward and I felt like I was in my groove.”

Despite the disappointing end to the weekend, Moxlow was appreciative of all the support from his sponsors, the guests that attended, and his crew. “It was an honor to drive for the Soldiers from the Wish for Our Heroes organization and for the city of Detroit. I'm looking forward to doing some testing and coming back stronger.”

CP-Carrillo was founded with the mission of servicing the needs of enthusiasts and racers who desire to build the highest quality engines. CP-Carrillo ensures the highest quality by using the latest technology to manufacture its products, including state-of-the-art equipment, proprietary tooling and dedicated cutters. Along with unique fixturing, computer modeling and five-axis machining, CP-Carrillo employs a multi-level inspection process that includes an advanced climate-controlled inspection department to guarantee that each piston and rod is second to none. If you are in the market for a rotating assembly no need to look further— pistons, rods, wrist pins, rings, except the crank. By purchasing all of these components together CP-Carrillo coordinates designs and specifications to allow these parts to integrate precisely and perform optimally- an advantage no other piston and conrod manufacturer can claim. CP-Carrillo is a member of PANKL Racing Systems.
